^A BASE BID: Includes but not limited to the construction of a 50-foot diameter structural steel water storage tank with concrete foundation. Furnish and install an electric motor driven fire pump system with enclosure, associated electrical equipment and transformer pad for new service. Work will also include the installation of all required piping tying into the existing fire water piping system and the city water system, which includes a backflow preventer. In addition, a section of 12-inch fire water line and supporting pipe bridge will need to be completely replaced along with the fire nozzles and foam canister at the oil docks. This is a Lump Sum bid item.
